DETAILED ACTION

Response to Amendment

The Examiner acknowledges the amending of claims 8 and 13.

Election/Restrictions

Claims 8-11, and 13-23 are allowable. The restriction requirement as set forth in the Office action mailed on 01/13/2009, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a).

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The Examiner notes agreement with the Applicant's arguments in the traversal to the previous restriction requirement. The restriction is withdrawn, and the claims are believed to be in condition for allowance.

Allowable Subject Matter

Claims 8-11 and 13-23 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 8 and 13 are allowable as the prior art failed to teach the thermo-optic prism based beam steering system for a plurality of tunable lasers. The prior art was found to teach the basics of the prism and grating system, but did not teach the included limitations directed towards the angled prism faces and their parallel relationship with each other wherein the second prism corrects the quality and shape of the light output from the first prism. Therefor the claims are believed to be in condition for allowance.

Claim 23 is believed to be allowable as it largely details the same system as claims 8 and 13 with the exception that the grating is omitted. The claim does however include additional limitations directed towards input/output lenses, the size of the beam emitted from the first prism, the material of the two prisms being the same, the outputting of the light to an optical fiber, and the use of a tuning heater and control with the first prism. These additional limitations are believed to be non-obvious in view of the prior art, and the claim is therefor believed to be in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
